Executive Summary

The goal of the Ad Campaign was to promote the MSMAI program of Wright State University in Hyderabad, India.

The Digital Marketing Ad Campaign focused on creating an 8-week campaign strategy with a budget of \$1500 to increase website traffic.

To create a solid and effective digital marketing campaign AdWords Campaign, the team concentrated on Search and Display Campaigns on Google Ads, Ads/Posts on College Social Channels like Facebook, and solving queries of potential students who are looking to get into MSMAI course on Quora/Reddit.

Evaluation of Campaign and Results

Initial Approach –

- Target market – Hyderabad, India
- The field of analytics is quickly growing and becoming a part of everyday life. More and more people are studying or gaining skills in this field to advance their careers in this rapidly growing environment.
- We decided to target people from Hyderabad who would be interested in this field, whether it be an undergraduate student studying tech/business subjects or an employee/business owner looking to level up their knowledge/skills to advance in their current field or switch to a different field.
- We carefully analyzed and curated a set of keywords that we thought would work best for our Ad Campaigns.

What changed and why –

We initially faced issues while trying to launch our Google Ads campaign. Despite adding images/videos to Display campaign or inputting keywords to the Search campaign, the ad strength was really limited. We also had a little trouble with the budget, not knowing how much was enough and how much we should start off with to get going.

As time passed, we decided to switch strategy and focused first on the Search campaign.

- We tested out a bunch of keywords, adding appropriate headlines and descriptions to match our messaging. After a couple of weeks, we added more keywords that we thought would work even better.
- Also, we had initially added Wright State University as one of the keywords but realized that we had to put it on the “Negative Keywords” list.

Below is the final list of keywords we used for our Search campaign:

	Cost ▼	Clicks ▼	CTR ▼
● Business analytics	US\$306.81	864	12.25%
● Marketing analytics	US\$195.03	847	11.66%
● Study in USA	US\$109.33	302	18.28%
● study in usa for international students	US\$13.75	32	21.48%
● business intelligence analyst	US\$8.79	30	2.28%
● Master's in USA	US\$3.94	4	4.35%
⊗ Wright State University	US\$0.75	18	21.69%
● STEM degree	US\$0.15	1	1.59%

For the Display campaign, we realized that the images we had initially added were not appropriately cropped and so, only half the image was showing up.

We then made adjustments to the image size and positioned it properly. We also added the descriptions and headings that would match the images and content. In doing so, we utilized the Responsive Display Ad option.

How performance improved over time –

By making changes and increasing the budget a little, we were able to improve the performance of our campaign.

Our Search campaign performed quite well while our Display campaign could not yield the expected results due to limited time.

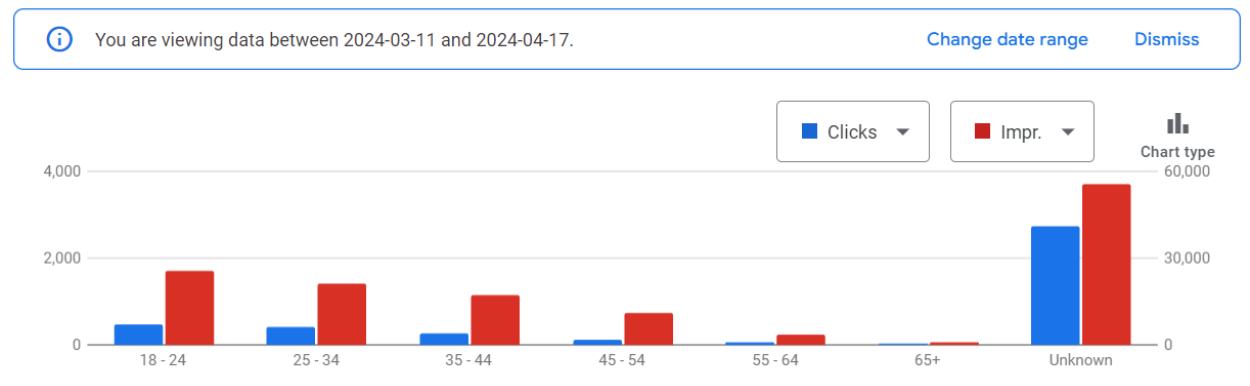

Below is the final tally for our Search campaign:

Some insights about the target market from the Search campaign:

1) Age:

Age report									
03/11/24 - 04/17/24									
Age	Ad group	Conversions	Cost / conv.	Clicks	Impr.	CTR	Avg. CPC	Cost	Conv. rate
18 - 24	Ad group 1	8	6.4	479	25654	1.87%	0.11	51.19	1.67%
25 - 34	Ad group 1	4	10.38	398	21247	1.87%	0.1	41.51	1.01%
35 - 44	Ad group 1	0	0	260	17339	1.50%	0.07	19.21	0.00%
45 - 54	Ad group 1	0	0	109	10884	1.00%	0.1	10.83	0.00%
55 - 64	Ad group 1	0	0	68	3653	1.86%	0.05	3.69	0.00%
65+	Ad group 1	0	0	22	854	2.58%	0.14	3.03	0.00%
Unknown	Ad group 1	44	15.52	2743	55575	4.94%	0.25	682.88	1.60%
Total: Account		56	14.51	4079	135206	3.02%	0.2	812.33	1.37%

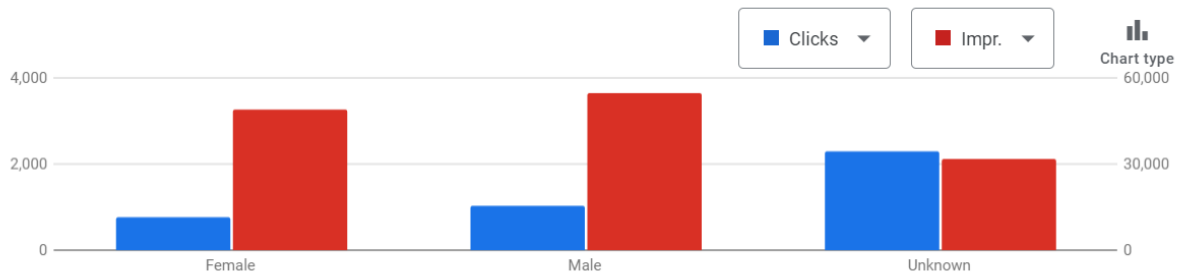

2) Gender:

Gender report									
03/11/24 - 04/17/24									
Gender	Ad group	Conversions	Cost / conv.	Clicks	Impr.	CTR	Avg. CPC	Cost	Conv. rate
Unknown	Ad group 1	39	16.2	2286	31625	7.23%	0.28	631.81	1.71%
Female	Ad group 1	5	16.01	766	48942	1.57%	0.1	80.04	0.65%
Male	Ad group 1	12	8.37	1027	54639	1.88%	0.1	100.48	1.17%
Total: Account		56	14.51	4079	135206	3.02%	0.2	812.33	1.37%

Below is the final tally for Display campaign:

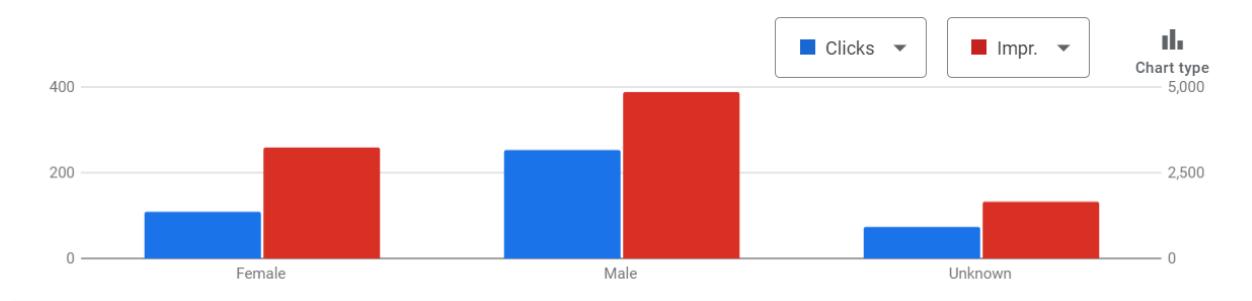

Some insights from the Display campaign:

1) Age:

2) Gender:

Justify the investment

In total, we spent \$1400 on our Ad campaigns plus our Facebooks post & video.

Promotion on	Cost (\$)
Search Campaign	812
Display Campaign	91
Facebook post	105
Facebook video	392
Total	1400

We started our marketing campaign with a post on RSCOB'S official Facebook page. Below is the image we had shared to promote the MSMAI program.

As stated earlier, we spent \$392 on this video, and we received 131,363 impressions on this video. Out of those, over 15 thousand people clicked on the link leading them to the program webpage.

Facebook is known for providing the most value for marketing campaigns, both in terms of costs and engagement. Both our posts have done really well, with the video receiving more impressions than we had expected.

Coming to our Google Ads campaign, we focused more on Search campaign compared to Display campaign.

We spent \$812 on our Search campaign, giving us more than 135K impressions and more than 4K clicks. We were able to reach people on many different sites and through different devices. The average CPC was \$0.20.

We spent \$91 on our Display campaign due to the limited time. But even with the time constraints, we received almost 10K impressions and 400+ clicks. The average CPC was \$0.21.

Overall, we tried to focus more on the Search campaign. We did not exceed the allocated budget, however we still had about \$100 left which could have been used on other campaigns.

What we learned as a group

None of us knew anything about digital marketing going into this session. We believed it to be advertisements that individuals made with images of the product and the message "Buy This."

The most important lesson for our group was learning about Google AdWords. Observing the metrics and how to analyze the data collected.

Tracking impressions and clicks was a revelation. We also learned a valuable lesson about tracking which ads are successful so we could invest more money in those. We learnt that we must change the keywords if we are receiving sufficient impressions but insufficient clicks.

If we had to do it all over again, we would have liked to delve deeper and inquire about improving our understanding of AdWords. This was new territory for us and with all the capabilities on this new platform, we all felt a little out of our depth.

We believe asking for extra assistance while creating our ads would have enhanced their results and helped us learn more. Furthermore, another thing we could have done would have been to ask what other groups did and to seek advice from our peers.

Going forward

If our group had two more months and more money to spend on this campaign, then we would make the following changes:

One is to spend more on Display Ads. This time we primarily focused on the Search campaign. So, if we had an extra 8 weeks, this time we would prioritize and spend more of our budget on the Display Ads. Based on the current results, we can tell that the campaign would achieve even better results including more clicks, impressions, etc.

Secondly, we would opt for influencer marketing. We would seek out experienced influencers who have a good follower base and a strong influence on students. Instead of choosing just one influencer and using most of the budget on them, we would choose 2-3 different influencers and allocate money accordingly. We would be able to reach a variety of people with different kinds of messaging because of the different influencers. This can also help us track whose video/marketing is doing well and whose is not.

Additionally, we would invest more time and money on RSCOB's Facebook page, because we got impressive clicks on the post and video that we had shared on this page. Facebook is also commonly used by parents, who can see the kind of posts the official WSU & RSCOB pages are sharing about the programs offered and can gain more knowledge about the University to determine if it's the right fit for their kids.

To conclude, we have learnt a lot about Digital Marketing, Google Ad campaigns, Social Media Marketing, etc. We feel confident that we can create better campaigns now considering all the knowledge we have gained while working on this campaign.
